

Screw terminal block 4mm² with
24V varistor, beige color

I terminali hanno un tempo di inserimento (D) di 20-30 sec. Dopo del tempo di inserimento, gli indici superiori di cui a una tensione di inserimento, anche se vengono a separare, non sono rimasti nella parte superiore. L'inserto è stato fatto in un unico pezzo. La gamma di modelli disponibili, con un design innovativo, è stata studiata per garantire la massima sicurezza e la massima durata.
