

For the installation on limited longitudinal space where high desemby wiring is needed together with reliable installation, special deferrowing howlibres level forminal blacks are satisfiable. The free level territoral blocks are suitable for circuits which are to be used and connected with specific equipment, as for example possible producing the space. The circuits blocks in a possible to connect in an optimal and economic manner both power spagly conductors on input to the sensor, and those on output carrying the signal of the same. Particularly in the TLS2 terminal blocks in the small back and lower levels can be used to feed the sensors in ct.; the feeding is distributed on the adjoining elements of the terminal back by them call special conformation specials.

The above mentioned conducting bodies have a fork, pointed towards the exterior of the terminal block, which connects to the homologous element of the adjoining terminal block. The resulting contact is clamped

in LuCk system, above security, all, when lacer officers contained in placers are supported in the page. He was a first page and the page like of the page like of brought level, the conductor for the return span and the security of conductor for the return span and the security of conductor for the return span and the security of conductor for the return span and the security of the security security. Set the security of the security s

in er cross-connection between the intermediate and tower levels or these terminal, blocks to the condigious ones of the TLS 2 can be performed by means of the two screws provided in the fork type conducting bodies of the TLS 2—the first of the Series – There from whatever connection; between the TLD 2 and TLS 2 terminal blocks a TLD/Pil intermediate and section must be interposed, to ensure electric insulation of the TLD 2 terminal block conducting parts, which otherwise would be uncovered.

## Screw

terminal block 2.5mm2, 3-levels, for sensor connection, beige color

| Series                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | TL                                                                                                                                                                                                                                                                                                                                                                                             |
