

For the institution on limited longitudual space where high feesing wiring is needed register with reliable longitudine, special feed frough whether level feeminal blocks are suitable. The three level terminal blocks are suitable for circuits within are to be used and connected with specific equipment, as for example, possible promises passors. In fact, through the combined use of 15.2 and 10.2 be reminal blocks it is prossible to connect in an optimal and economic manner both power supply conductors on input to the sensor, and those on output carrying the signal of the same. Particularly in the TLS_Lettermida block, the intermidable of long and the sensors in circuit in the Table sensors in circuit in the sensor in the sensor in the down long carrying the same and supplies distributed on the adjoining elements of the terminal blood by means of a special LOSC connection system.

The above mentioned conducting occues have a lonk, pointed towards the exterior of the terminal block. which connects to the homologous element of the adjoining terminal block. The resulting contact is clamped with a screw, supplied already inserted in the conductor element.

In cross-connection between the intermediate and lower serves of these terminal blocks to the configuous ones of the ILS.2 can be performed by means of the vice screws provided in the fork type conducting bodies of the ILS.2 - the first of the Series - free from whatever connection; between the ILD.2 and ILS.2 learning blocks at ILD/Pl intermediate and section must be Interposed, to source electric insulation of the TLD.2 terminal block conducting parts, which otherwise would be uncovered. screw terminal block 3 levels for sensors, 2.5 mm², grey

Series	TL
Code	TL100GR
Туре	TLS.2/GR
HS code	85369010
Colour	grey
TECHNICAL FEATURES	
Function/Type	3 levels – for sensors
Rated cross-section	2.5 mm ²
Connecting capacity	
Flexible wire	0.2-4 mm ²
Rigid wire	0.2-4 mm ²
Wire with ferrule - ferrule type	2.5 mm ² – WP25/14
Electrical characteristics according to IEC EN standard	
Maximum voltage AC/DC	250 V
Maximum current (rated cross-section)	24 A
Caliber	A3
Electrical characteristics according to UL Standard	
Maximum voltage AC/DC	600 V
Maximum current (rated cross-section)	15 A
Section (min-max)	20-12 (AWG)
Tightening torque value (UL)	3.5 lb.in
Electrical characteristics according to ATEX directive and IEC Ex standard	
Maximum voltage AC/DC	-
Maximum current (rated cross-section)	_
Rated impulse withstand voltage / pollution degree	4 kV / 3
Insulation stripping length	8 mm
Tightening torque value (nom. / max.)	0.4 / 0.8 Nm
Widht (pitch)	6.2 mm
Length	62.5 mm
Height mounted on TH35-7.5/TH35-15/G32	52 / 60 / – mm
Insulation material temperature index (EN 60216-1)	130 °C
Plastic material	
ACCESSORIES	Polyamide UL94V-0
End section	
	TLS/PT/GR (cod. TL101GR)
